Allergen-proof covers for mite allergy sufferers

“Made in Germany” for over
35 years

Scientific - medically tested - clinically proven

ALLERGO HEALTHCARE

We protect your health

ALLERGOCOVER®

allergen-proof covers for mite allergy

Typical complaints caused by an allergy to house dust mites are sneezing, a runny nose, streaming eyes and coughing, and in serious cases this can even result in mite-induced asthma. The most important immediate action you can take is to cover cushions, duvets and mattresses with special allergen-proof encasings. This prevents the mite allergens from escaping into the air and entering the respiratory system.

What do you need to know when buying an allergy encasing?

1. Proven effectiveness
2. Consistent mite and mite-allergen impermeability (such as woven fabric without any allergen holes)
3. Ensures sleeping comfort
4. Non-toxic materials
5. Easy to maintain and long-lasting

ALLERGOCOVER® has excellent material properties:

- Densely-woven, uncoated microfibre
- Interwoven carbon fibres prevent electrostatic charge
- Highly permeable to air and water vapour
- High breathability
- Long-lasting even under high levels of stress
- Dust mite allergen-proof encasing with special zip
- Washable up to 60 °C
- Smooth material prevents dust mite colonisation

ALLERGOCOVER®

High-tech woven fabric with interwoven carbon thread

The principle of ALLERGOCOVER®

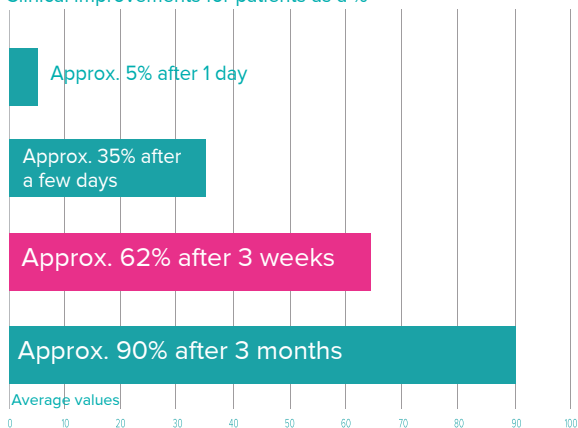

[1] Brehler R, Kniest F. Allergy Clin Immunol Int – J World Allergy Org 2006;18:15–19. [2] Muller-Scheven D, et al. Allergologie 1998;21:534-540 [3] Portnoy J, Miller JD; Williams PB, Chew GL, Zaitoun F, et al. Environmental assessment and exposure patients of Punjab; India. International Journal of Advance Research 2016; 4:115-1161 [4] Müller-Scheven D, Kniest F., Distler M., Hofman-Wecker M., Results of a retrospective study on the efficacy of an allergen and mite proof encasing; Allergologie 1998; 534-540.

The results were maintained over a period of 3-4 years⁴.

Dust mites and asthma

Did you know that one in two people with an untreated head cold caused by dust mite allergies will go on to develop **mite-induced asthma**? A house dust mite allergy is the most common **cause of allergic asthma**. This makes it all the more important to use an effective and clinically-tested encasing such as ALLERGOCOVER[®].

ALLERGOCOVER®

It's the weave that makes the difference

Thanks to a **densely woven**, high-tech microfibre fabric, ALLERGOCOVER® offers an effective allergen barrier compared with non-woven encasings that are typically used. The smooth surface of ALLERGOCOVER® prevents dust mites from colonising and the density of the fabric prevents allergen holes from occurring. Allergy encasings made of non-woven fabric are not scientifically recommended.³

ALLERGOCOVER®

Effective allergy protection³

Non-woven fabric with allergen holes

Ineffective allergy protection³

Dust mite allergens break down into tiny particles. As a woven fabric with a consistently small pore size, ALLERGOCOVER® effectively blocks even these tiny allergen particles.

< 0.5 µm

ALLERGOCOVER[®]

A quality product from Germany

1. Clinically proven effectiveness

In a clinical study, we have proven that ALLERGOCOVER[®] significantly reduces symptoms and consumption of medicine by 46%.¹

2. TÜV-tested and certified quality

Each year we voluntarily submit ALLERGOCOVER[®] to TÜV Nord for testing to confirm its consistently high quality.

3. Öko-Tex label

The materials used in ALLERGOCOVER[®] comply with the test criteria of the ÖKO TEX[®] STANDARD 100 product class 1. ALLERGOCOVER[®] is therefore also suitable for children and people suffering from neurodermatitis.

4. Top marks from Stiftung Warentest

The Stiftung Warentest consumer organisation has assessed ALLERGOCOVER[®] as a thoroughly good cover with optimum protection from dust mite allergens.

5. Good sleeping comfort²

ALLERGOCOVER[®] is light, thin, permeable to air & water vapour and anti-static. As a result, 93% of our customers assess the sleeping comfort as good.

6. 12 year warranty

ALLERGOCOVER[®] is low-maintenance and long-lasting. We are so confident in our product and its quality that it comes with a 12 year warranty.

7. 100% “Made in Germany” quality

Our product is woven in Germany and is assembled in our production plant.

8. Custom-made products

Our range comprises 50 available standard sizes. Custom-made products are always possible. Give us a call.

98% polyester 2% carbon

We recommend covering double beds and split mattress beds with ALLERGOCOVER® and if children have allergies, ideally you should cover the beds of their parents or siblings as well. This ensures optimal protection from dust mite allergens.
